

# NASA announces our NIAC swarming video

John I Davies and Gill Norman

Our Swarming Proxima video showcased by  
NASA's Innovative Advanced Concepts!

Further to our article on The Interstellar Coracle at the NASA's Innovative Advanced Concepts (NIAC) Symposium in Pasadena (see Principium issue 49, page 27 (<https://i4is.org/principium-49/>)), we were very proud that the NIAC subsequently took our video and embellished it beautifully. Stirring music, subtitles and the NASA wrapper all combine to infuse a strong sense of wonder and optimism in our interstellar enthusiasts.

Our i4is-US team created the first draft of this video and commissioned Dr Mark Garlick to transform it into an exquisite piece of animated art. This version was displayed at our exhibition stands at a small handful of events, such as the 82nd World Science Fiction Convention in Glasgow in August 2024. NASA had specifically requested that all the presenters at the NIAC Symposium prepare a short video of their project; we were very honoured that they chose ours to showcase. Robert G Kennedy III, President of i4is-USA stated that he was “overjoyed”; a feeling echoed by the i4is-UK team.

The video was officially released by NASA Space Tech on YouTube in September 2025.

See ([https://www.youtube.com/watch?v=XXW\\_keR5OIM](https://www.youtube.com/watch?v=XXW_keR5OIM)). The description on YouTube contains a link to Marshall Eubanks' (Space Initiatives, Inc) article on the NASA website <https://go.nasa.gov/408MnEv>, as well as providing a link to view the presentation from the Symposium itself <https://vimeo.com/showcase/10973241?video=1008860866#t=8471s>.

This presentation shows Marshall explaining the work undertaken by the team. Four of the team members take part in the Q&A; they are - left to right - T Marshall Eubanks (Space Initiatives Inc), Robert G Kennedy III (i4is-US), Andreas M Hein (i4is) and W Paul Blase (Space Initiatives Inc).

We hope you enjoy it as much as we did.
